# DCS Connect

---

DCS Connect with BACnet is a cost-effective, digital controller that maximizes energy savings while allowing occupants to control their lighting preferences. With all the standard DCS features included, plus the addition of BACnet, integration into building intelligence and management systems is now viable expanding the projects to include entire buildings.

---

STEINEL has performed strenuous tests and quality checks to ensure the DCS line includes and aligns with our high quality standards. Successful DCS install projects have already been completed using a mix of sensors, wall switches, photocells and DCS controllers in a variety of commercial buildings. The STEINEL DCS allows for improved control at no additional cost. Use only what you need in small areas and utilize all the DCS features for larger, more complex spaces. Contact your Regional Sales Manager today to request a free layout on your next project.

STEINEL is known for superior performance and dedicated to the development of cutting-edge technology.
